# THE RED DEVIL

## THE STANDARD DOLLY JACK OF THE WORLD

ASK YOUR JOBBER OR WRITE US

The fact that the **Red Devil Dolly Jack** was the first of its kind on the market; that **thousands** of garages in the United States are realizing an endless saving of money and time by its use; that European countries as well as Canada are constantly demanding the **Red Devil,** makes it the **Standard** Jack of the World.

The **Red Devil** does the work of all other Jacks combined, paying for itself from the start; and its all-steel construction, together with the constant study for possible improvements, insures maximum efficiency.

**One** stroke of the handle raises your car ready to swing in any direction; and for handling trucks, for use on the wash-rack, loading and unloading, changing tires, putting on chains, etc., the **Red Devil** is indispensable.
